## # MikroTik Router As Switch Using Bridge (MTCNAPP3) by @themmfuad

---

**STEP-1:** Turn on RoMON on all 3 routers and change their hostname serially SW1, SW2, and SW3.

**STEP-2:** Go to “Bridge -> Add”, set “Name=LAN\_BRIDGE” apply & OK.

**STEP-3:** Go to “Bridge -> Ports -> Add” Select the interface to add to this LAN and select “Bridge= LAN\_BRIDGE”, and use this method to add all the interfaces that are in this LAN.

**STEP-4:** Assign the appropriate IP Address to the Hosts.

**STEP-5:** Check the connection between the Hosts.
