

RoMON-GNS3-MTCNA (MTCNAPP1) by @themmfuad

STEP-1: Create a topology like bellow:

STEP-2: Go to the consoles of each router. And run this command:

```
"tool romon set enabled=yes secret=admin"
```

STEP-3: Open "Winbox", in the "Neighbors" tab, click "Refresh" and the details of "R1" will show up, click on it and click "Connect to RoMON".

Managed Neighbors		
Refresh		
MAC Address	IP Address	Identity
0C:BD:F4:48:00:00	192.168.57.134	R1

STEP-4: Select the router you want to manage through RoMON and click "Connect"

Managed RoMON Neighbors	
Refresh	
Address	Identity
0C:48:96:A8:00:01	R2
0C:ED:90:CD:00:00	R3
